

NAME

troff - format text

SYNOPSIS

troff [*+n*] [*-n*] [*-t*] [*-f*] [*-w*] [*-i*] [*-a*] files

DESCRIPTION

Troff formats text for a Graphic Systems phototypesetter according to control lines embedded in the text files. *Troff* is based on *nroff*(I). The non-file option arguments are interpreted as follows:

- +n* Commence typesetting at the first page numbered *n* or larger.
- n* Stop after page *n*.
- t* Place output on standard output instead of the phototypesetter.
- f* Refrain from feeding out paper and stopping the phototypesetter at the end.
- w* Wait until phototypesetter is available, if currently busy.
- i* Read from standard input after the files have been exhausted.
- a* Send a printable approximation of the results to the standard output.

A TROFF Guide is available [1] which can be used in conjunction with an NROFF Manual [2].

FILES

/usr/lib/suftabsuffix hyphenation tables
/tmp/rtn?temporary
