

NAME

dp – dp11 201 data-phone interface

DESCRIPTION

The *dp0* file is a 201 data-phone interface. *Read* and *write* calls to *dp0* are limited to a maximum of 512 bytes. Each write call is sent as a single record. Seven bits from each byte are written along with an eighth odd parity bit. The sync must be user supplied. Each read call returns characters received from a single record. Seven bits are returned unaltered; the eighth bit is set if the byte was not received in odd parity. A 10 second time out is set and a zero-byte record is returned if nothing is received in that time.
