

NAME

update – periodically update the super block

SYNOPSIS

update

DESCRIPTION

Update is a program that executes the *sync* primitive every 30 seconds. This insures that the file system is fairly up to date in case of a crash. This command should not be executed directly, but should be executed out of the initialization shell command file. See *sync*(II) for details.

SEE ALSO

sync(II), *init*(VII)

BUGS

There is a system bug which, it is suspected, may be aggravated by this program. Until further notice, *update* should not be run.
