

NAME

tiu – Spider interface

DESCRIPTION

Spider is a fast digital switching network. *Tiu* is a directory which contains files each referring to a Spider control or data channel. The file `/dev/tiu/dn` refers to data channel *n*, likewise `/dev/tiu/cn` refers to control channel *n*.

The precise nature of the UNIX interface has not been defined yet.

FILES

`/dev/tiu/d?`, `/dev/tiu/c?`
