

NAME

dn – dn11 ACU interface

DESCRIPTION

The *dn?* files are write-only. The permissible codes are:

0-9 dial 0-9
: dial *
; dial #
= end-of-number

The entire telephone number must be presented in a single *write* system call.

It is recommended that an end-of-number code be given even though only one of the ACU's (113C) actually requires it.

FILES

/dev/dn0 connected to 801 with dp0
/dev/dn1 connected to 113C with ttyc
/dev/dn2 not currently connected

SEE ALSO

dp(IV), dc(IV), write(II)

BUGS

It needs a delay character to handle second dial tone.
