

NAME

kl – KL-11/TTY-33 console typewriter

DESCRIPTION

Tty (as distinct from *tty?*) refers to the console typewriter hard-wired to the PDP-11 via a KL-11 interface. The disciplines involved in dealing with *tty* are identical to those for *tty?* and section DC(I) should be consulted. The following differences are salient:

The system calls *stty* and *gtty* apply, and the bits in the mode word have the same meanings, but the speed-select word is ignored. The quit signal is generated by the key marked 'alt mode.'

By appropriate console switch settings, it is possible to cause UNIX to come up as a single-user system with I/O on this device.
