

**NAME**

**ttyn** – return name of current typewriter

**SYNOPSIS**

**jsr      pc,ttyn**  
**ttyn(file)**

**DESCRIPTION**

*Ttyn* hunts up the last character of the name of the typewriter which is the standard input (from *as*) or is specified by the argument *file* descriptor (from C). If *n* is returned, the typewriter name is then “/dev/*ttyn*”.

**x** is returned if the indicated file does not correspond to a typewriter.
