

NAME

cat – concatenate and print

SYNOPSIS

cat file ...

DESCRIPTION

Cat reads each file in sequence and writes it on the standard output. Thus:

cat file

is about the easiest way to print a file. Also:

cat file1 file2 >file3

is about the easiest way to concatenate files.

If no input file is given *cat* reads from the standard input file.

If the argument – is encountered, *cat* reads from the standard input file.

SEE ALSO

pr(I), cp(I)

DIAGNOSTICS

none; if a file cannot be found it is ignored.

BUGS

cat x y >x and **cat x y >y** cause strange results.
