

**NAME**

*dsw* – delete interactively

**SYNOPSIS**

***dsw*** [ directory ]

**DESCRIPTION**

For each file in the given directory (‘.’ if not specified) *dsw* types its name. If *y* is typed, the file is deleted; if *x*, *dsw* exits; if new-line, the file is not deleted; if anything else, *dsw* asks again.

**SEE ALSO**

*rm*(I)

**BUGS**

The name *dsw* is a carryover from the ancient past. Its etymology is amusing.
