-

NAME

        man – run off section of UNIX manual

SYNOPSIS

        man [section] [title ...]

DESCRIPTION

        Man is a shell command file that will locate and run off one or more sections of this manual. *Section* is the section number of the manual, as an Arabic not Roman numeral, and is optional. *Title* is one or more section names; these names bear a generally simple relation to the page captions in the manual. If the *section* is missing, **1** is assumed. For example,

                man man

        would reproduce this page.

FILES

        /usr/man/man?/*

BUGS

        The manual is supposed to be reproducible either on the phototypesetter or on a typewriter. However, on a typewriter some information is necessarily lost.
