NAME
 gtty - get typewriter status

SYNOPSIS
 (gtty = 32.)
 (file descriptor in r0)
 sys gtty; arg
 ...
 arg: .=.+6
 gtty(fildes, arg)

DESCRIPTION

Gtty stores in the three words addressed by *arg* the status of the typewriter whose file descriptor is given in r0 (resp. given as the first argument). The format is the same as that passed by *stty*.

SEE ALSO

stty (II)

int arg[3];

DIAGNOSTICS

Error bit (c-bit) is set if the file descriptor does not refer to a typewriter. From C, a -1 value is returned for an error, 0, for a successful call.
