

NAME

ibm – submit off-line job to HO IBM 370

SYNOPSIS

ibm [-j] file ...

DESCRIPTION

Ibm arranges to have the 201 data phone daemon submit a job to the IBM 370 at Holmdel via the Murray Hill H6070. Normally the job is submitted with enough “JCL” (the IBM version of the shell) to return the output to your box at Murray Hill. You can supply your own if you dare– the -j option suppresses all JCL.

If there are no arguments, the standard input is read and submitted. Thus *ibm* may be used as a filter.

FILES

/usr/dpd/* spool area
/etc/passwd personal ident cards
/etc/dpd daemon

SEE ALSO

dpd (VIII), passwd (V)

BUGS

Stuff is sent on 6-bit cards, so lower case vanishes, as do some of the special characters.
