-

NAME
        dsw − delete interactively

SYNOPSIS
        dsw [directory]

DESCRIPTION
        For each file in the given directory ('**.**' if not specified) *dsw* types its name. If **y** is typed, the file
        is deleted; if **x,** *dsw* exits; if new-line, the file is not deleted; if anything else, *dsw* asks again.

SEE ALSO
        rm (I)

BUGS
        The name *dsw* is a carryover from the ancient past. Its etymology is amusing.
