DU(I) 1/20/73 DU(I)

NAME

du - summarize disk usage

SYNOPSIS

DESCRIPTION

Du gives the number of blocks contained in all files and (recursively) directories within each specified directory or file *name*. If *name* is missing, '.' is used.

The optional argument -s causes only the grand total to be given. The optional argument -a causes an entry to be generated for each file. Absence of either causes an entry to be generated for each directory only.

A file which has two links to it is only counted once.

BUGS

Non-directories given as arguments (not under -a option) are not listed.

Removable file systems do not work correctly since i-numbers may be repeated while the corresponding files are distinct. Du should maintain an i-number list per root directory encountered.
