NAME

-

times – get process times

SYNOPSIS

(times = 43.; not in assembler) **sys times; buffer**

times(buffer)
struct tbuffer *buffer;

DESCRIPTION

Times returns time-accounting information for the current process and for the terminated child processes of the current process. All times are in 1/60 seconds.

After the call, the buffer will appear as follows:

struct tbuffer {

int	proc_user_time;
int	proc_system_time;
int	child_user_time[2];
int	child_system_time[2];

};

The children times are the sum of the children's process times and their children's times.

SEE ALSO

time (I)

_

DIAGNOSTICS

BUGS

The process times should be 32 bits as well.
