-

NAME
>   ttyn − return name of current typewriter

SYNOPSIS
>   **jsr   pc,ttyn**
>
>   **ttyn(file)**

DESCRIPTION
>   *Ttyn* hunts up the last character of the name of the typewriter which is the standard input (from *as*) or is specified by the argument *file* descriptor (from C). If *n* is returned, the typewriter name is then ''/dev/tty*n*''.
>
>   **x** is returned if the indicated file does not correspond to a typewriter.
