

NAME

ncheck – generate names from i-numbers

SYNOPSIS

ncheck [**-i** numbers] [**-a**] [filesystem]

DESCRIPTION

Ncheck with no argument generates a pathname vs. i-number list of all files on a set of default file systems. The **-i** flag reduces the report to only those files whose i-numbers follow. **-a** allows printing of the names '.' and '..', which are ordinarily suppressed. A file system may be specified.

The full report is in no useful order, and probably should be sorted.
